Tamil	Native	★★★★★
English	Intermediate	★★★★★

## PROJECTS

### Truck Rental website

10/2025 - 11/2025 Pollachi

The Truck Rental Agency project is a web-based application designed to simplify and automate the process of renting trucks for transportation and logistics needs. The system allows users to browse available trucks, view details, check availability, and make booking requests online. An admin panel is included to manage trucks, bookings, users, and rental status efficiently.

The front end of the application is developed using HTML, CSS, and JavaScript to create a responsive and user-friendly interface. Node.js is used on the server side to handle requests, manage business logic, and ensure smooth communication between the client and server. MongoDB serves as the database to store user information, truck details, bookings, and payment records securely.

This project improves operational efficiency, reduces manual work, and provides a reliable digital platform for both customers and administrators in the truck rental business.

- Developed a complete Truck Rental Management System using full-stack technologies.

## SUMMARY

Motivated Full-Stack Web Developer with hands-on experience in building responsive and user-friendly web applications using HTML, CSS, JavaScript, React.js, Node.js, Express.js, and MongoDB. Strong understanding of front-end and back-end development, RESTful APIs, and database management. Developed real-world projects including a Truck Rental Agency Management System, focusing on performance, scalability, and clean code. Passionate about learning new technologies and delivering efficient software solutions.

## TRAINING / COURSES

Python in Excel	Full-Stack Deep Learning with python
Introduction to Web Design and Development	Cloud Computing and Distributed Systems

## STRENGTHS

- ◆ Easy to learn and time management  
Easy to learn my work and Complete my work on time

## KEY ACHIEVEMENTS

- ◆ Code Debugging,Quiz  
I participated in Code Debugging,Quiz,Connexion in other colleges

## SKILLS

Problem Solving · Communication · Adaptability · Html · Css · Java Script · Node.js · Express.js · React.js · Mongo db
